

A local solution to the dual 5th Busemann-Petty problem.

Vladyslav Yaskin

University of Alberta

We show that the dual version of the fifth Busemann-Petty problem has a positive solution for bodies that are sufficiently close to the Euclidean ball in the Banach-Mazur distance. Joint work with M. Alfonseca, F. Nazarov, and D. Ryabogin.

In Special Session 5 on Convexity, High-Dimensional Probability and Applications at the Mathematical Congress of the Americas 2025.
