

Foliation rigidity for toral automorphisms.

Boris Kalinin

Pennsylvania State University

We discuss rigidity results for partially hyperbolic and hyperbolic toral automorphisms related to exceptional properties of their invariant foliations. The main new techniques use the non-stationary normal forms. This talk is based on joint works with Andrey Gogolev and Victoria Sadovskaya.

In Special Session 22 on Partially Hyperbolic Dynamical Systems: Ergodic and Topological Aspects at the Mathematical Congress of the Americas 2025.
