

Towards equivariant mirror symmetry for Hitchin systems

John Alexander Cruz Morales

National University of Colombia, Colombia

In this talk, after introducing Aganagic's proposal for equivariant mirror symmetry, I will present a set of speculative ideas on how Aganagic's picture can be extended to Hitchin systems. This is part of an ongoing project with M. Mulase and O. Dumitrescu.

In Special Session 32 on Vector Bundles on Varieties and Quantization at the Mathematical Congress of the Americas 2025.
