

Primitivity of pullbacks of hyperplane sections for Lagrangian fibrations

Ljudmila Kamenova

Stony Brook University

Consider a hyperkaehler Lagrangian fibration over a projective space. We prove that the pullback line bundle associated to a hyperplane section on the base is a primitive class in the second integral cohomology of the hyperkaehler variety.

In Special Session 32 on Vector Bundles on Varieties and Quantization at the Mathematical Congress of the Americas 2025.
