

Math Outreach - What to do, What not to do and Why is it so important

Jeanette Shakalli

FUNDAPROMAT

The Panamanian Foundation for the Promotion of Mathematics (FUNDAPROMAT) invites all members of the mathematics community to attend our special session on math outreach. Attendees will hear from panelists who have run math outreach initiatives, providing them with advice on what to do and what not to do when organizing these types of events. Speakers from a wide variety of life experiences will illustrate why math outreach is so important and share the challenges they have faced and the results they have achieved. We aim to empower more members of the mathematics community to return to their own institutions and organize outreach activities around the world.

In Special Session 68 on Professional Interests at the Mathematical Congress of the Americas 2025.
